COMMENTS:

The August 15, 2005, amendments added restrictions relating to the disclosure by state agencies or contracted third parties of encryption keys or personal information contained in identification documents. The provisions of this bill are not applicable to the department since radio wave transmissions are not used in the department's badge systems. Additionally, the department meets the exclusion criteria specified in the bill, although the limitations identified for continued use may prevent state agencies from taking advantage of future technology advances in future security enhancements.
