Corporations Filing a Combined Report

Introduction

This publication sets forth the concepts of the unitary method of taxation and its application by the State of California to corporations subject to either the franchise tax or income tax. It includes instructions for preparing a combined report, which a corporation is required to use in computing its California tax liability, when the corporate activities are part of a unitary business conducted by the corporation and its related corporations. A combined report is not equivalent to a consolidated return for federal purposes.

This publication does not address water's-edge statutes under which corporate taxpayers may elect to exclude from the combined report some or all of the income and apportionment factors of certain foreign affiliates in the unitary group. For more information about the water's-edge election, get Form 100W Tax Booklet.

Important Information

Regulations providing detailed rules regarding the general mechanics of combined reporting are in Cal. Code Regs., tit. 18 section 25106.5 through 25106.5-11. Because those regulations reflect long-standing practices of the Franchise Tax Board (FTB), the regulations generally apply retroactively. For taxable years beginning **before** April 22, 1999 and for taxable years beginning on or **after** January 1, 2011:

1. Gross receipts from sales of tangible personal property (except sales to the U.S. Government) which are shipped from an office, store, warehouse, factory, or other place of storage within California are assigned to California unless a member of the seller's combined reporting group is taxable in the state of destination. If a member of the seller's combined reporting group is taxable in the state of destination, then the gross receipts from that sale are excluded from the California sales factor numerator.
2. The California sales of each corporation within a combined reporting group will be taken into account in the apportionment of business income to California, including amounts attributable to entities exempt from taxation in California such as entities protected by P.L. 86-272. For more information, see Cal. Code Regs., tit. 18 section 25106.5(c)(7)(A), Appeal of Finnigan Corporation, Opn. On Pet. For Reg., 88-SBE-022A (1/24/1990), and Revenue and Taxation Code (R&TC) Section 25135(b).

For taxable years beginning on or **after** April 22, 1999 and **before** January 1, 2011:

1. Gross receipts from sales of tangible personal property (except sales to the U.S. Government) which are shipped from an office, store, warehouse, factory, or other place of storage within California are assigned to California unless the seller is taxable in the state of destination, even if another member of the seller's combined reporting group is taxable in the destination state. See Cal. Code Regs., tit. 18 section 25106.5(c)(7).
2. The California sales of those corporations within a combined reporting group that are taxable in California will be taken into account in the apportionment of business income to California. See Appeal of Huff Corporation, 99-SBE-005 (4/22/99), and Cal. Code Regs., tit. 18 section 25106.5(c)(7)(B).

Regulations providing detailed rules relating to the treatment of intercompany transactions between members of a combined reporting group have been adopted (Cal. Code Regs., tit. 18 section 25106.5-1). Those regulations apply to intercompany transactions that occur between members in taxable years beginning on or after January 1, 2001.

In *Farmer Bros. Co. v. Franchise Tax Board* (2003) 108 Cal App 4th, 134 Cal Rptr. 2d 390, the California Court of Appeal found R&TC Section 24402 to be unconstitutional. A statute that is held to be unconstitutional is invalid and unenforceable. Therefore, R&TC Section 24402 deduction is not available.

For taxable years beginning on or after July 1, 2008, credit earned by members of a combined reporting group may be assigned to an affiliated corporation that is a member of the same combined reporting group. A credit assigned may only be claimed by the affiliated corporation against its tax in taxable years beginning on or after January 1, 2010. For more information, get form FTB 3544, Election to Assign Credit Within Combined Reporting Group, form FTB 3544A, List of Assigned Credit Received and/or Claimed by Assignee, or go to ftb.ca.gov and search for **credit assignment**.

NOLs incurred in taxable years beginning on or after January 1, 2013, shall be carried back to each of the preceding two taxable years.

The allowable NOL carryback percentage varies. For an NOL incurred in a taxable year beginning on or after:

- January 1, 2013, and before January 1, 2014, the carryback amount shall not exceed 50% of the NOL.
- January 1, 2014, and before January 1, 2015, the carryback amount shall not exceed 75% of the NOL.
- January 1, 2015, the carryback amount shall be 100% of the NOL.

Any corporation entitled to a carryback period pursuant to Internal Revenue Code (IRC) Section 172(b)(3) may elect to relinquish/waive the entire carryback period with respect to an NOL incurred in the 2014 taxable year. By making the election, the taxpayer is electing to carry an NOL forward instead of carrying it back to the previous two years. Once made, the election shall be **irrevocable** for such taxable year. For more information, get form FTB 3805Q, Net Operating Loss (NOL) Computation and NOL and Disaster Loss Limitations – Corporations.

For taxable years beginning on or after January 1, 2013, R&TC Section 25128.7 requires all business income of an apportioning trade or business, other than an apportioning trade or business under R&TC Section 25128(b), to apportion its business income to California using the single-sales factor formula. For more information, get Schedule R, Apportionment and Allocation of Income, or go to ftb.ca.gov and search for **law changes**.

For taxable years beginning on or after January 1, 2013, any apportioning trade or business under R&TC Section 25128(b), that derives more than 50% of its "gross business receipts" from conducting one or more qualified business activities, shall apportion its business income to California using the three-factor formula.

Qualified business activities mean the following:

- Extractive or agricultural activities
- Savings and loan activities
- Banking or financial business activities

Unitary corporations, partnerships, and LLCs must apply the more than 50% test to the business receipts of the entire group. If the entire group has more than 50% of its gross business receipts from one or more qualified activities, all members of the group are not eligible to use the single-sales factor formula and all members of the group must use the three-factor formula. If the entire group has 50% or less of its gross business receipts from one or more qualified activities, all taxpayer members of the group must use the single-sales factor formula. For more information, get Schedule R, or refer to R&TC Section 25128(b).

For taxable years beginning on or after January 1, 2013, certain cable system operators that apportion business income under R&TC Section 25128.7 shall assign sales based on the specified provisions. For more information, get Schedule R, or refer to R&TC Section 25136.1.

For taxable years beginning on or after January 1, 2013, R&TC Section 25136 requires **all** taxpayers to assign sales, other than sales of tangible personal property, using market assignment.

The market assignment method and single-sales factor apportionment may result in California sourced income or apportionable business income if a taxpayer is receiving income from intangibles or services from California sources. Such income includes:

1. Sales from services are assigned to California to the extent that the purchaser of the service receives the benefit of the service in California.
2. Sales of intangible property are assigned to California to the extent that the intangible property is used in California. For marketable securities, the sales are in California if the customer is in California.
3. Sales from the sale, lease, rental, or licensing of real property are assigned to California if the real property is located in California.
4. Sales from the rental, lease, or licensing of tangible personal property are in California if the property is located in California.

For more information, see R&TC Section 25136 and Cal. Code Regs., tit. 18 section 25136-2, get Schedule R, or go to ftb.ca.gov and search for **law changes**.

For taxable years beginning on or after January 1, 2011:

- R&TC Section 25120 was amended to add the definition of gross receipts. "Gross receipts" means the gross amounts realized (the sum of money and the fair market value of other property or services received) on:
 - The sale or exchange of property,
 - The performance of services, or
 - The use of property or capital (including rents, royalties, interest, and dividends) in a transaction that produces business income, in which the income, gain, or loss is recognized (or would be recognized if the transaction were in the United States) under the IRC.

Amounts realized on the sale or exchange of property shall not be reduced by the cost of goods sold or the basis of property sold. For a complete definition of "gross receipts," refer to R&TC Section 25120(f).

- R&TC Section 25135(b) adopts the Finnigan rule in assigning sales from tangible personal property.
- A taxpayer is doing business if it actively engages in any transaction for the purpose of financial or pecuniary gain or profit in California or if any of the following conditions is satisfied:
 - The taxpayer is organized or commercially domiciled in California.
 - The sales, as defined in R&TC Section 25120 (e) or (f), of the taxpayer in California, including sales by the taxpayer's agents and independent contractors, exceed the lesser of \$529,562 or 25% of the taxpayer's total sales.
 - The real property and tangible personal property of the taxpayer in California exceed the lesser of \$52,956 or 25% of the taxpayer's total real property and tangible personal property.
 - The amount paid in California by the corporation for compensation, as defined in R&TC Section 25120(c), exceeds the lesser of \$52,956 or 25% of the total compensation paid by the taxpayer.

In determining the amount of the taxpayer's sales, property, and payroll for doing business purposes, include the taxpayer's pro rata share of amounts from partnerships and S corporations. These amounts are reported on the partner's and shareholder's Schedule K-1 on Table 2, Part C.

For more information regarding the items listed above, get Schedule R, or go to ftb.ca.gov and search for **law changes**.

The Unitary Method

Corporations deriving income from sources both within and outside California are required to measure their tax liability by income derived from, or attributable to, sources within California. To determine the portion of total income that is attributable to this state, California utilizes the unitary business principle. This concept has been validated by income and franchise tax cases for more than 80 years.

Under the unitary method, as applied by California, all of the elements comprising a single trade or business are viewed as a whole or unit, hence the term "unitary." The business income from all activities of a unitary business is combined into a single report, whether such activities are conducted by divisions of a single corporation or by members of a commonly controlled group of corporations. For most businesses, the combined business income is apportioned to California by a formula derived from the Uniform Division of Income for Tax Purposes Act (UDITPA) under R&TC Sections 25120-25139. The elements required in a combined report are discussed in detail beginning on page 5.

Development of the Unitary Method

The theory underlying the unitary business principle has its roots in property tax law, where the issue of apportionment arose during the 1870s in the context of railroad taxation (*State Railroad Tax Cases* (1876) 92 U.S. 575). A broader application later evolved as the states adopted the practice of measuring taxes by income. As early as 1920, the United States Supreme

Court approved the use of a formula to apportion the income of a single corporation among several states in the case of *Underwood Typewriter Co. v. Chamberlain* (1920) 254 U.S. 113.

California's use of formula apportionment dates to 1929 and the enactment of the original Franchise Tax Act. The use of the unitary method to combine the income from unitary divisions of a single corporation was validated by the United States Supreme Court in *Butler Bros. v. McCollgan* (1942) 315 U.S. 501. In *Edison California Stores v. McCollgan* (1947) 30 Cal.2d.472, the California Supreme Court extended the unitary business concept to allow apportionment of combined income of a common business activity conducted by a multi-corporate group.

While R&TC Section 25101 provides the general authority for use of the unitary business concept, no statutes have ever been adopted to define precisely the scope of application of the unitary principle. Instead, the law has evolved through a series of judicial decisions. For example:

- In *Superior Oil Co. v. Franchise Tax Board* (1963) 60 Cal.2d 406, the California Supreme Court held that once it is determined that a business with income from sources within and outside the state is unitary, formula apportionment MUST be utilized.
- The United States Supreme Court found California's application of the unitary business principle to multiple corporations to be constitutional in *Container Corporation v. Franchise Tax Board* (1983) 463 U.S. 159, aff'g 117 Cal. App.3d 988 (1981).
- Application of the unitary method is required whether the unitary business is carried on over state or international boundaries. Application of the unitary method to worldwide activities of a single corporation was first sanctioned by the United States Supreme Court in *Bass, Ratcliff & Gretton Ltd. v. State Tax Commission* (1924) 266 U.S. 271. More recent decisions upholding the application of the unitary method to worldwide activities of multiple corporations are *Container Corporation v. Franchise Tax Board*, discussed above; *Barclays Bank Internat., LTD v. Franchise Tax Board* (1994) 129 L. Ed 2d. 244; and *Colgate-Palmolive v. Franchise Tax Board* (1994) 129 L. Ed 2d. 244.

Tests for Determining Unity

Both *Butler Bros.* and *Edison California Stores*, discussed previously, set forth tests to be used in determining whether the activities of several divisions or corporations should be considered unitary. In *Butler Bros.*, the court held that a "unitary business" exists where there is: (1) unity of ownership; (2) unity of operation as evidenced by central divisions for functions such as purchasing, advertising, accounting, and management; and (3) unity of use in its centralized executive force and general system of operations. In *Edison California Stores*, the court held that if the operation of the portion of the business done within the state is dependent upon or contributes to the operation of the business outside the state, the operations are unitary.

The three unities test and the contribution or dependency test have been applied by the California courts in a variety of cases. (See, e.g., *Superior Oil Co. v. Franchise Tax Board* (1963) 60 Cal.2d 406, 411-412; *Honolulu Oil Corp. v. Franchise Tax Board* (1963) 60 Cal.2d 417, 423-424; *John Deere Plow Co. v. Franchise Tax Board* (1951) 38 Cal.2d 214, 221-222; *Container Corporation*

of America v. Franchise Tax Board (1981) 117 Cal.App.3d 988, 994-1001, aff'd 463 U.S. 159, (1983); *Chase Brass & Copper Co. v. Franchise Tax Board* (1970) 10 Cal. App.3d 496, 501-502.) If either the three unities test or the contribution/dependency test is satisfied, the businesses are unitary (*A.M. Castle & Co. v. Franchise Tax Board* (1995) 36 Cal. App. 4th 1794.)

The United States Supreme Court has also referred to a unitary business as one that exhibits "contributions to income resulting from functional integration, centralization of management, and economies of scale." (*Mobil Oil Corp. v. Comm'r of Taxes of Vt.* (1980) 445 U.S. 425, 438; *F.W. Woolworth Co. v. Taxation and Revenue Dept of the State of N.M.* (1982) 458 U.S. 354, 366; *Allied Signal v. Director, Taxation Division* (1992) 504 U.S. 768.) That court further noted that, "The prerequisite to a constitutionally acceptable finding of a unitary business is a flow of value, not a flow of goods." (*Container Corp. of America v. Franchise Tax Board* (1983) 463 U.S. 159, 178.) The United States Supreme Court has stated that for commonly controlled activities to be nonunitary, they must be part of "unrelated business activity which constitutes a 'discrete business enterprise.'" (*Mobil Oil Corp.*, supra, 445 U.S. at 439-440.)

Cal. Code Regs., tit. 18 section 25120 provides additional rules and examples regarding what constitutes a unitary business. The regulation: (1) recognizes that a single taxpayer may have more than one "trade or business"; and (2) sets forth three factors, the presence of any one of which creates a "strong presumption" that the activities of the taxpayer constitute a single trade or business. Cal. Code Regs., tit. 18 section 25120 provides in pertinent part:

(b) Two or More Businesses of a Single Taxpayer. A taxpayer may have more than one "trade or business." In such cases, it is necessary to determine the business income attributable to each separate trade or business. The income of each business is then apportioned by an apportionment formula which takes into consideration the in-state and out-of-state factors, which relate to the trade or business, the income of which is being apportioned.

The determination of whether the activities of the taxpayer constitute a single trade or business, or more than one trade or business, will turn on the facts in each case. In general, the activities of the taxpayer will be considered a single business if there is evidence to indicate that the segments under consideration are integrated with, dependent upon, or contribute to each other and the operations of the taxpayer as a whole. The following factors are considered to be a good indication of a single trade or business, and the presence of any of these factors creates a strong presumption that the activities of the taxpayer constitute a single trade or business:

- (1) Same type of business – This factor applies when all of a taxpayer's activities are in the same general line, such as in the operation of a chain of retail grocery stores.
- (2) Steps in a vertical process – An example of this factor would be a taxpayer that explores for and mines copper ores; concentrates, smelts, and refines the copper ores, and fabricates the refined copper into consumer products.

- (3) Strong centralized management – A taxpayer that might otherwise be considered as engaged in more than one trade or business is properly considered as engaged in one trade or business when there is a strong central management, coupled with the existence of centralized departments for such functions as financing, advertising, research, or purchasing.

For court decisions that discuss strong centralized management and the application of the unitary concept to diverse businesses, see *Mole-Richardson Co. v. Franchise Tax Board* (1990) 220 Cal.App.3d 889, 894; *Tenneco West, Inc. v. Franchise Tax Board* (1991) 234 Cal.App.3d 1510 and *Dental Insurance Consultants, Inc. v. Franchise Tax Board* (1991) 1 Cal. App.4th 343. For application of the unitary tests to passive holding companies, see FTB Legal Rulings 95-7 and 95-8, dated November 29, 1995.

As noted above, the activities of a single corporation or group of commonly owned corporations do not always constitute a single unitary business. If a taxpayer has two or more trades or businesses that are not unitary with one another, separate combined report computations must be made to compute business income and apportionment factors for each trade or business and to apportion to California the business income of each.

California law classifies income as either “business” or “nonbusiness.” Business income is income arising from transactions and activity in the regular course of the taxpayer’s trade or business. Business income includes income from tangible property and intangible property if the acquisition, management, and disposition of the property constitute integral parts of the taxpayer’s regular trade or business operations. Business income is assigned through formula apportionment. R&TC Section 25120(a). Nonbusiness income is all other income, R&TC Section 25120(d), and is generally allocated to a particular jurisdiction (R&TC Sections 25123-25127). Regulations under R&TC Section 25120 also provide guidance for distinguishing between business and nonbusiness income. For further discussion and examples of business and nonbusiness income, get the instructions for Schedule R.

Unity of Ownership

A corporation may file a combined report with other members of a unitary group only if the corporations are members of a commonly controlled group as defined by R&TC Section 25105. Generally, a commonly controlled group exists when stock possessing more than 50% of the voting power is owned, or constructively owned, by a common parent corporation (or chains of corporations connected through the common parent) or by members of the same family. A commonly controlled group also includes corporations that are stapled entities, see R&TC Section 25105(b)(3). Special rules are provided in R&TC Section 25105 for partnerships, trusts and transfers of voting power by proxy, voting trust, written shareholder agreement, etc.

The Use of a Combined Report

Two or more corporations conducting a unitary business within and outside California are required to use the combined reporting approach to determine California source income subject to tax by California.

R&TC Section 25101.15 allows corporations conducting a unitary business wholly within California to file a combined report.

A corporation that has made a valid election to be treated as an “S corporation” may not generally be included in a combined report. However, in some cases, the FTB may use combined reporting methods to clearly reflect income of an S corporation, R&TC Section 23801(d)(1).

The combined report is a means by which the income of a unitary business is divided among the taxing jurisdictions in which the trade or business is conducted. A combined report is not a “return,” but merely the name given to the calculations by which multi-entity unitary businesses apportion income on a geographic basis. There is no “combined report” form; tax is calculated on an attachment to Form 100 or Form 100W using the format described in this publication.

In a combined report, the entire amount of unitary business income of all corporations in the unitary group (including unitary members with no property, payroll, or sales within California) is aggregated in the combined report.

The combined business income of the unitary group is then apportioned to California and to the unitary members subject to tax in California. Details of this formula are discussed in the instructions to Schedule R. Refer to R&TC Sections 25129 through 25137, the corresponding regulations and FTB Notice 2004-5 for guidelines on calculating the apportionment formula. The process of apportioning the combined business income to the taxpayer members of the group is commonly referred to as “intrastate apportionment.” The rules for those computations are provided in Cal. Code Regs., tit. 18 section 25106.5(c)(7). The California net income of each member is then computed, taking into account its apportioned share of the unitary group business income or loss plus any income from a business wholly conducted in California, California source nonbusiness income or loss, and allowable California source net operating loss. Unless otherwise provided by statutory authority, credits are applied against the tax on a separate entity basis and specific credit(s) are only available to the taxpayer corporation that incurred the expense that generated the credit(s). See *General Motors Corp. v. Franchise Tax Bd.*, (2006) 39 Cal. 4th 773, 790. Unlike a consolidated return, in which the group is treated as a single taxpayer, members of a unitary business are taxed individually and each affiliate doing business, qualified to do business, or incorporated in California is subject to at least the minimum franchise tax. Generally, each California taxpayer included in the combined report must file its own tax return using Form 100 or Form 100W. However, some unitary groups may elect to file a single group Form 100 or Form 100W and report the sum of the separate tax liabilities of the unitary members. For more information, get Schedule R and go to Side 6, Schedule R-7.

Contents of a Combined Report

A combined report should contain all of the following:

- A list of subsidiaries/affiliates, their California corporation numbers, federal employer identification numbers (FEINs), and California Secretary of State (SOS) file number, if applicable.
- A combined profit and loss statement in column format disclosing each corporation’s statement of profit and loss.
- A schedule in column format disclosing the various adjustments for each corporation necessary to convert the combined profit and loss statement to the combined income subject to apportionment. This schedule includes any adjustments necessary to revise federal or foreign income to that reported for California purposes, as well as adjustments for income from a separate trade or business or for nonbusiness income or loss.
- A combined apportionment formula in column format disclosing for each corporation the total amount of property, payroll, and sales, and the amount of California property, payroll, and sales.
- A schedule in column format disclosing for each corporation any items of nonbusiness income or expense allocated to California.
- Schedules disclosing the computation of the charitable contributions adjustment.
- A schedule in column format of the alternative minimum tax calculation for each corporation.
- Schedules in column format disclosing for each corporation all data required by Form 100 or Form 100W. These schedules include:
 1. Balance sheets.
 2. Gains and losses from sale or exchange of assets.
 3. Taxes on or measured by income.
 4. Dividends and interest received.
 5. Income or loss from rentals, royalties, partnerships, and miscellaneous sources.
 6. Net operating losses.
- Schedules in column format showing the computation of income apportionable and allocable to this state for each member of the group, and the computation of each member’s tax credits and tax liability.

A comprehensive example illustrating the use of the above schedules begins on page 11.

Consolidated Return Distinguished From a Combined Report

Unless specifically stated otherwise, California does not follow the federal consolidated return regulations provided under IRC Section 1502. With respect to earnings and profits (E&P) and stock basis, California has no provisions similar to the investment adjustments allowed for federal purposes under Treas. Reg. Sections 1.1502-32 and -33. The E&P of each entity in the combined report is calculated on a separate accounting basis and does not include the E&P of any lower tier subsidiaries (see *Appeal of Young’s Market Company*, Cal. St. Bd. of Equal., 11/19/86). Likewise, the cost basis of a unitary subsidiary’s stock is not adjusted to reflect the E&P of that subsidiary (see *Appeal of Safeway Stores*, Cal. St. Bd. of Equal., 3/2/62 and *Appeal of Rapid American Corp.* Cal. St. Bd. of Equal., 10/10/96).

S Corporations

If an S corporation holds 100% of the stock of a subsidiary, and elects to treat that subsidiary as a qualified subchapter S subsidiary (QSub), then a combined return is not filed. Instead, the QSub is disregarded, and the activities, assets, liabilities, income, deductions, and credits of the QSub are treated as activities, assets, liabilities, income, deductions, and credits of the S corporation parent. If the QSub is not unitary with the S corporation, then it is treated as a separate division and separate computations must be made to compute business income and apportionment factors for the QSub and the S corporation, and to apportion to California the business income of each.

Corporations With Different Accounting Periods

Common Accounting Period Necessary

When filing a combined report, each member must align its income and apportionment data from its own accounting period to the accounting period of the "principal member." Where there is a parent-subsidiary relationship in the combined reporting group, the parent corporation will generally be the principal member. If there is no corporation in the combined reporting group which is a parent corporation to all the other members, the principal member will be the member that is expected to have, on a recurring basis, the largest value of real and tangible personal property in California as determined for property factor purposes. However, the taxpayer members of a combined reporting group may elect to treat any other member of the combined reporting group as the "principal member." Once the election is made in the first year that a combined report is required, the principal member may only be changed with the consent of the FTB. See Cal. Code Regs., tit. 18 section 25106.5(b)(12).

Income Calculation

Each member of the group should generally use the actual figures taken from its books to determine the proper income and related computations corresponding to the accounting period of the principal member. This will usually require an interim closing of the books for members whose normal accounting period differs from the accounting period of the principal member. Alternatively, a pro-rata method of converting income to the principal member's accounting period will be accepted as long as the results do not produce a material misstatement of income apportioned to the state (see Cal. Code Regs., tit. 18 section 25106.5-4(c)).

Pro-Rata Method

Under the pro-rata method, income of a member of the group is converted to the accounting period of the principal member on the basis of the number of months falling within the applicable taxable year. For example, if a parent corporation operates on a calendar year basis and a subsidiary to be included in a combined report operates on a September 30 taxable year, it is necessary to assign 9/12 of the subsidiary's unitary income of one taxable year and 3/12 of the unitary income of the succeeding taxable year to arrive at a full twelve months' income to be included in the combined report. Where this

procedure results in using the income of a corporation whose taxable year has not yet closed, it may be necessary to make an estimate based on available information and amend the tax return at a later date.

Apportionment of Combined Unitary Income Using a Common Accounting Period

The factors of the combined formula should be computed on the basis of the same accounting period that was used to compute the unitary income. If an interim closing of the books was done to determine income attributable to the accounting period of the principal member, then the actual figures from the interim closing should be used to determine the apportionment factors as well. If the pro-rata method is used to convert income, then a pro-rata method should also be used to convert the factors of a member of the group to the accounting period of the principal member.

Once income and apportionment factors have been placed on a common accounting period, combined unitary business income is apportioned to California and to each of the taxpayer member corporations filing returns in California. For each California reporting corporation with a normal accounting period that differs from the accounting period of the principal member, the California income apportioned to that corporation is then converted back to the corporation's normal accounting period. This conversion is made on the basis of the number of months falling within the common taxable year of the group.

The computations necessary to determine the combined income under the pro-rata method, when members of the group are on different accounting periods, are illustrated in the example beginning on page 11 of this publication. For more information, see Cal. Code Regs., tit. 18 section 25106.5-4.

Part-Year Members

A part-year member is a corporation that either becomes a member, or ceases to be a member of the unitary group, after the beginning of the taxable year. If the part-year member is required to file two short period returns for the taxable year, then the income for the period in which the member was unitary with the group must be determined on a combined basis. The income for the remaining short period will be determined on a separate basis (or on a combined basis with a different group if the taxpayer had a unitary relationship with one or more corporations in that short period).

If the part-year member is **not** required to file short period returns, then it must file a single return for the entire year. The income reported on that return would be determined by combined reporting procedures for any period in which the part-year member was part of a unitary group, and by separate accounting for any period it was not part of a unitary group. Use the actual income and apportionment data from the common unitary period to apportion income for that period. See the interim closing discussion under "Apportionment of Combined Unitary Income Using a Common Accounting Period." However, the comprehensive example beginning on page 11 contains an acceptable pro-rata method for this computation, if that method does not cause income apportioned to this state to be materially misstated. For more information, see Cal. Code Regs., tit. 18 section 25106.5-9.

R&TC Section 24632 provides that the taxable year of a taxpayer may not be different than the taxable year used for purposes of the IRC, unless initiated or approved by the FTB. Whenever a taxpayer is required to file a federal return for a period of less than 12 months, a California return for that period is also required. Federal due dates for these short period returns also apply to California.

Adjustments for Intercompany Transactions

Intercompany Sales

Cal. Code Regs., tit. 18 section 25106.5-1 provides detailed rules relating to the treatment of intercompany transactions between members of a combined reporting group. These regulations apply to intercompany transactions that occur on or after January 1, 2001.

In general, the regulations adopt the treatment of intercompany transactions for federal consolidated return purposes (Treas. Reg. Section 1.1502-13). Under those regulations, income from intercompany transactions is generally deferred until immediately before such time that:

- 1) The asset leaves the group by a sale or other disposition to a nonmember.
- 2) The buyer and the seller no longer constitute members of the same combined reporting group, including by means of a water's-edge election.
- 3) The purchaser converts the asset to a nonbusiness use.

When income from a deferred intercompany transaction is required to be restored, it is apportioned using the apportionment percentages of the members of the group for the taxable year in which the income is restored. Special rules apply for "partially included water's-edge corporations" described by R&TC Sections 25110(a)(4) and (a)(6).

A taxpayer may elect to report income from an intercompany transaction in the year in which that transaction occurred, if it has made a similar election under Treas. Reg. Section 1.1502-13(e), or in the event that regulation does not apply, if the intercompany transaction was reported as current taxable income in the year of the intercompany sale for federal or foreign national tax purposes.

Intercompany Distributions in Excess of Stock Basis

Income from an intercompany distribution between members of a combined reporting group that exceeds the payor's E&P and stock basis, described by IRC Section 301(c)(3), is deferred. That income is restored to the extent that the holder of the stock disposes of its stock, even if the distributor remains in the holder's combined reporting group. If the distributor liquidates into the distributee, the deferred income is taken into account ratably over 60 months, unless the taxpayer elects to take such income into account in full in the year of the liquidation.

Effect of Intercompany Transactions on Apportionment Factors

Intercompany transactions are disregarded for purposes of the property factor. The purchaser takes the seller's original cost, prior to the intercompany transaction, so long as the seller and purchaser remain in the same combined reporting group. If the purchaser and the seller leave the same combined

Apportionment Factor of a Corporation and a Unitary Partnership Standard Method - Single-Sales Factor Formula

	EVERYWHERE		CALIFORNIA	
	Corporation A	Partnership P	Corporation A	Partnership P
Sales	500,000	300,000	400,000	100,000

Corporation A's 20% share of Partnership P's of sales is included in the combined apportionment factor.

		EVERYWHERE	CALIFORNIA	FACTOR
Combined Sales:	Corporation A	500,000	400,000	
	Partnership P (20%)	60,000	20,000	
	Combined	560,000	420,000	

Assume that the net business income for Corporation A and Partnership P was \$300,000 and \$100,000 respectively. Assuming that Corporation A's distributive share of Partnership P's profits and losses was also 20%, Corporation A's net income apportioned to California would be:

Corporation A's net business income	\$300,000
Corporation A's distributive share of Partnership P's net business income (\$100,000 x 20%)	20,000
	320,000
Multiplied by combined apportionment factor (from above)	x 75%
Corporation A's net income apportioned to California	\$240,000

reporting group, resulting in a restoration of deferred income, the property factor is adjusted to reflect the purchaser's original cost. Intercompany rents are also disregarded for purposes of the property factor.

Intercompany transactions are disregarded for purposes of the sales factor, even if income from an intercompany transaction is required to be restored as a result of the purchase and the seller leaving the same combined reporting group. If an asset that was sold in an intercompany transaction is later sold to a nonmember, the gross receipt from the sale to the nonmember is reflected in the sales factor of the intercompany purchaser.

Dividends

To the extent that intercompany dividends are paid out of E&P derived from unitary business income, they are eliminated in computing the California measure of tax (R&TC Section 25106). In determining whether a dividend is paid out of unitary E&P, distributions are deemed to be paid first out of current E&P and then out of prior years' accumulation in reverse order of accumulation. Distributions paid out of nonbusiness E&P, or distributions from E&P accumulated prior to the time the payer corporation became a member of the combined group, are not eliminated from the income of the recipient corporation (although such dividends may be subject to deduction under R&TC Section 24411).

For taxable years beginning on or after January 1, 2008, dividend elimination is allowed regardless of whether the payer/payee are taxpayer members of the California combined unitary group return, or whether the payer/payee had previously filed California tax returns, as long as the payer/payee filed as members of a comparable unitary business outside of this state when the earnings and profits from which the dividends were paid arose.

In addition, dividend elimination is allowed for dividends paid from a member of a combined unitary group to a newly formed member of the combined unitary group if the recipient corporation has been a member of the combined unitary group from its formation to its receipt of the dividends. Earnings

and profits earned before becoming a member of the unitary group do not qualify for elimination. Get Schedule H (100), Dividend Income Deduction, or Schedule H (100W), Dividend Income Deduction – Water's-Edge Filers, for more information.

Intercompany Transactions Prior to January 1, 2001

Intercompany transactions which occurred before January 1, 2001, are governed by pre-existing practices, even if, in a later year, the asset which was the object of an intercompany transaction is later resold to a nonmember or the seller and the purchaser discontinue their combined reporting relationship. Accordingly, the prior practices of the FTB are reproduced here.

Summary of Prior Practices

The following guidelines reflect the FTB's policy regarding adjustments necessary to properly reflect intercompany transactions among unitary affiliates included in the combined report that occurred in taxable years beginning before January 1, 2001.

- **Inventories**
Income from intercompany sales of inventory is eliminated from unitary business income. The seller's basis in the inventory will carry over to the buyer in the intercompany sale. Intercompany profits in inventory shall be eliminated for property factor purposes.
- **Intangible Assets**
Gain or loss from intercompany sales of intangible assets shall be eliminated from unitary business income. The seller's basis in the intangible assets will carry over to the buyer in the intercompany sale.
- **Fixed Assets and Capitalized Items**
The gain or loss on intercompany sales of business fixed assets or capitalized intercompany charges and expenditures between members of a combined group are generally deferred. The exception to this rule occurs when an affiliated group that files a consolidated federal return elects not to defer gain or loss on intercompany transfers. In that case, the federal election will be allowed for the combined report.

Under the general rule, the gain or loss remains deferred as long as both the seller and the purchaser remain in the combined group and the asset is not sold to outsiders. When either the seller or purchaser is no longer a member of the combined group, or the group for any reason terminates combined reporting, the gain or loss is reportable by the seller at a time immediately preceding the date either corporation ceases to be a member of the group. If the asset is sold to a third party, the deferred gain or loss is reportable by the combined group in the year of sale. A water's-edge election is also a restoration event which will cause previously deferred intercompany gains and losses to be included in income on a pro-rata basis over five years (refer to FTB Notice 89-601 for more information of this computation). The amount of gain recognized upon the occurrence of a restoration event is generally the same amount that would be reportable for federal purposes under similar circumstances in a consolidated return.

Where intercompany gain or loss is deferred, the basis of the asset for property factor purposes shall be the seller's cost.

- **Other Factor Adjustments**
For factor purposes, intercompany sales and other intercompany revenue items are eliminated in computing the numerator and denominator of the sales factor. Intercompany rent charges are also eliminated from the property factor computation.

Unitary Partnerships

When a corporation is a partner in a partnership and the partnership's activities are unitary with the corporation's activities (disregarding ownership requirements), then the corporation's share of the partnership's trade or business is combined with the corporation's trade or business (see Cal. Code Regs., tit. 18 section 25137-1).

For example, assume that Corporation A has a 20% partnership interest in Partnership P and that the activities of Corporation A and Partnership P are unitary. The unitary business is required to use a single-sales factor under R&TC Section 25128.7. The apportionment factor for Corporation A and Partnership P is calculated above.

Applying an NOL in a Combined Report

YEAR 1:	Corp. X	Corp. Y	Corp. Z	Combined
Unitary business income (loss) subject to apportionment	(400,000)	(10,000)	60,000	(350,000)
Apportionment percentages	5%	1%	3%	9%
Loss apportioned to California (Combined loss x apportionment %)	(17,500)	(3,500)	(10,500)	(31,500)
Nonbusiness items wholly attributable to California	50,000	(2,500)	0	
California net income (loss)	32,500	(6,000)	(10,500)	
NOL available to carryback or carry forward	0	(6,000)*	(10,500)*	

YEAR 2:	Corp. X	Corp. Y	Corp. Z	Combined
Unitary business income (loss) subject to apportionment	50,000	80,000	(5,000)	125,000
Apportionment percentages	6%	4%	4%	14%
Income apportioned to California (Combined income x apportionment %)	7,500	5,000	5,000	17,500
Nonbusiness items wholly attributable to California	2,500	(10,000)	0	
California net income (loss)	10,000	(5,000)	5,000	
Application of NOL carryover from Year 1	0	0	(5,000)	
California net income (loss)	10,000	(5,000)	0	
NOL available to carryback or carry forward	0	(5,000)	0	

	Corp. X	Corp. Y	Corp. Z
Remaining NOL from Year 1	0	(6,000)	(5,500)
Loss in Year 2	0	(5,000)	0
NOL available to carryback or carry forward	0	(11,000)	(5,500)

* In this example, Corp. Y and Corp. Z made the election to relinquish/waive the NOL carryback and elected to carry the NOL forward.

Net Operating Losses (NOLs)

California incorporates, with specific modifications, the provisions of IRC Section 172, concerning NOLs incurred in the conduct of a trade or business.

NOLs incurred in taxable years beginning on or after January 1, 2013, shall be carried back to each of the preceding two taxable years.

The allowable NOL carryback percentage varies. For an NOL incurred in a taxable year beginning on or after:

- January 1, 2013, and before January 1, 2014, the carryback amount shall not exceed 50% of the NOL.
- January 1, 2014, and before January 1, 2015, the carryback amount shall not exceed 75% of the NOL.
- January 1, 2015, the carryback amount shall be 100% of the NOL.

The corporation computes the NOL carryback in Part III of form FTB 3805Q.

Election to Waive NOL carryback – Any corporation entitled to a carryback period pursuant to IRC Section 172(b)(3) may elect to relinquish/waive the entire carryback period with respect to an NOL incurred in the 2014 taxable year. By making the election, the taxpayer is electing to carry an NOL forward instead of carrying it back to the previous two years. Once made, the election shall be **irrevocable** for such taxable year. To make the election, check the box in Part I under Election to Waive Carryback, of form FTB 3805Q and attach form FTB 3805Q to the tax return.

For taxable years beginning in 2010 and 2011, California suspended the NOL carryover deduction.

Corporations continued to compute and carryover NOLs during the suspension period. However, corporations with net income after state adjustments (pre-apportioned income) of less than \$300,000 or with disaster loss carryovers were not affected by the NOL suspension rules.

Note. If taxpayers are required to be included in a combined report, the 2010 and 2011 NOL limitation amount of \$300,000 or more shall apply to the aggregate amount of pre-apportioned income for **all** members included in the combined report.

NOLs incurred in any taxable years beginning on or after January 1, 2000, and before January 1, 2008, may be carried forward for 10 years. For NOLs incurred in any taxable years beginning on or after January 1, 2008, 100% of the NOL may be carried forward for 20 years.

For taxable years where the taxpayer has a water's-edge election in effect, the NOL deduction is not allowed to the extent that such NOL was determined by taking into account the income and factors of a corporation that would not have been included in the combined report if a water's-edge election had been in effect in the year in which the loss was incurred.

For more information regarding NOLs, get form FTB 3805Q.

California also has special NOL provisions for losses incurred in farming businesses affected by Pierce's disease, Enterprise Zones (EZ), the Los Angeles Revitalization Zone, Targeted Tax Areas (TTA), and Local Agency Military Base Recovery Areas (LAMBRA). For taxable years beginning on or after January 1, 2013, corporations can no longer generate/incur any TTA NOL. For taxable years beginning on or after January 1, 2014, corporations can no longer generate/incur any EZ or LAMBRA

NOL. However, corporations can claim TTA, EZ, or LAMBRA NOL carryover deduction from prior years. For more information regarding these NOLs, see R&TC Sections 24416.1 through 24416.7, 24416.20, and/or get form FTB 3805D, NOL Carryover Computation and Limitations – Pierce's Disease; form FTB 3805Z, Enterprise Zone Business Booklet; form FTB 3806, Los Angeles Revitalization Zone Business Booklet; form FTB 3807, Local Agency Military Base Recovery Area Business Booklet; and form FTB 3809, Targeted Tax Area Business Booklet.

Application of NOL Carryovers in a Combined Report

Taxpayers that are members of a unitary group filing a combined report must separately compute the NOL carryover/carryback and application of the NOL carryover/carryback for each corporation in the group (R&TC Section 25108). The NOL for each taxpayer in the combined group is computed by determining each taxpayer's share of the unitary business income or loss and then adjusting for any nonbusiness income or loss of this taxpayer. In a subsequent year, when a member of the group has positive California net income (from either unitary business or nonbusiness income), only the amount of NOL **attributable to that particular taxpayer** may be deducted. The example above shows the computations involved in determining and applying an NOL in a combined report. See Cal. Code Regs., tit. 18 section 25106.5(e).

Another example of an NOL is shown in Schedule 5-F of the comprehensive example included in this publication. Although unitary business income apportioned to each taxpayer in that example was positive, a nonbusiness loss caused Corporation C to have a net loss for California. The NOL will be

available to be carried back to the preceding two taxable years and/or carried forward to subsequent years, although a deduction will be allowed only from California net income apportioned or allocated to Corporation C.

Capital Loss Limitation

California conforms to the federal provisions for netting gains and losses from involuntary conversions, Section 1231 assets, and capital assets. If the netting process results in net capital losses, the losses are not deductible in the current year, but may be carried over to subsequent years. In a combined reporting group, the members' business gains and losses in each class (i.e., the classes are involuntary conversion, Section 1231, short-term capital or long-term capital) are combined (without netting between classes), and each taxpayer member determines its share of the business gain/loss items in each class based on its apportionment percentage. Then, each taxpayer member applies the federal netting rules to its post-apportioned share of business gain/loss items and its California-source nonbusiness gain/loss items. If a net loss results for any taxpayer member, it may be carried forward by that member for up to five years. For more information regarding the application of the capital loss limitation in a combined report, see Cal. Code Regs., tit. 18 section 25106.5-2.

The forms used to compute gains and losses from involuntary conversions, Section 1231 assets and capital assets, are the federal Form 4684, Casualties and Thefts; California Schedule D-1, Sales of Business Property; and California Form 100 or Form 100W, Schedule D, Capital Gains and Losses.

Application of Capital Loss Limitation in a Combined Report

Members of a combined reporting group should complete a new federal Form 4684, California Schedule D-1, and California Form 100 or Form 100W, Schedule D for each member of the combined reporting group, as provided below. Be sure to compute gains and losses using California basis information under California law. Enter that member's separate entity data using California amounts, and identifying whether the items relate to business or nonbusiness income.

Also, prepare a schedule similar to that provided in the Capital gain (loss) example on the next page, and in Schedule 5-E of the comprehensive example on page 23.

Complete federal Form 4684, Section B only, through line 37, for each member of the combined reporting group, using that member's separate entity data. Any amounts entered on line 31 should be transferred to that member's Schedule D-1, line 14. Enter net business and California nonbusiness gain/loss data from lines 36 and 37 in the appropriate column of lines 1a and 1c in a format similar to the Capital gain (loss) example on the next page.

Complete California Schedule D-1, lines 1 and 2, and lines 4 through 6 for each member of the combined reporting group. Do not enter data on line 3. Combine and enter business and California nonbusiness data from those lines in the appropriate column of lines 2a and 2c in a format similar to the Capital gain (loss)

example on the next page. Do not enter data on lines 7 through 9 or lines 11 and 12 of Schedule D-1. The remaining portion of Schedule D-1 should be completed for each member of the combined reporting group using separate entity data.

Gains (losses) reported on the Schedule D-1 on lines not specifically referenced above or included in the Capital gain (loss) example are not included in the capital loss limitation calculation. These amounts are included in federal income before state adjustments and should not be removed from income prior to apportionment.

Complete California Form 100 or Form 100W, Schedule D for each member of the combined reporting group, using that member's separate entity data. Do not enter data on Schedule D, line 3 or lines 9 through 11. Enter the amounts from Schedule D, line 4 in the appropriate column of lines 3a and 3c in a format similar to the Capital gain (loss) example on the next page. Do not enter any other data from Schedule D-1 on Schedule D, line 6; enter only amounts from capital gain distributions, if any. Enter the amounts from Schedule D, line 8 in the appropriate column of lines 4a and 4c in a format similar to the Capital gain (loss) example on the next page.

If the combined reporting group uses the members' federal return(s) as the starting point for the computation of California income, certain items included in federal taxable income should be revised. For example:

- Casualty or theft loss (federal Form 4684, line 38a).
- Section 1231 (federal Form 4797, line 11) or
- Net capital gain (Schedule D (Form 1120), line 17).

These items should be reversed as a California addition or subtraction adjustment on Schedule 1-B of the comprehensive example. Additional adjustments resulting from federal/state differences in the use of federal Form 4684 for California purposes, in the California Form 100, Schedule D and in the California Schedule D-1 may also be appropriate, and should likewise be entered as a California adjustment on Schedule 1-B of the comprehensive example.

The Capital gain (loss) example on the next page provides the format to use to calculate the capital loss limitation. In this example, all figures carried from federal Form 4684, California Schedule D-1, and California Form 100 or Form 100W, Schedule D are assumed. The California apportionment percentages shown at the top of the schedule for this example are assumed values. Those percentages would have been calculated in a schedule comparable to Schedule 5-D of the comprehensive example, included in this publication.

Alternative Minimum Tax (AMT)

Generally, the calculation of alternative minimum taxable income (AMTI) incorporates the same concepts used in the calculation of regular California taxable income. The AMTI of the members of a combined group must therefore be allocated or apportioned to California and to each member in the same manner as is regular taxable income. The AMT NOL is computed based upon AMTI and is determined for each member of the combined group using the computations described on page 8.

The calculation of AMTI includes an adjustment that represents 75% of the difference between the adjusted current earnings (ACE) of the corporation over the AMTI determined without regard to the ACE adjustment or the AMT NOL deduction (pre-adjustment AMTI). To compute this adjustment, the ACE of the members of a combined group must be allocated or apportioned in the same manner as regular taxable income and AMTI. Each taxpayer member must compare the ACE, after apportionment and allocation to California (California source ACE), with its pre-adjustment AMTI, after apportionment and allocation to California (California source pre-adjustment AMTI).

If California source ACE exceeds California source pre-adjustment AMTI (a positive ACE adjustment), 75% of the difference must be added to California source pre-adjustment AMTI. On the other hand, if California source pre-adjustment AMTI exceeds the ACE (a negative ACE adjustment), the negative adjustment may be applied to reduce California source pre-adjustment AMTI only to the extent that the aggregate positive California source ACE adjustments in prior years for that particular taxpayer member exceeded its aggregate negative ACE California source adjustments. See FTB Legal Ruling 94-3.

The computations necessary to calculate AMT for taxpayers in a combined report are shown in Schedule 6 of the comprehensive examples beginning on page 25.

Election to File a Group Return

The FTB has adopted regulations under which some or all of the taxpayer members of a combined reporting group may elect to file a group return. See Cal. Code Regs., tit. 18 section 25106.5-11 for more information. The group return satisfies the requirement of each electing member to file its own return. The tax liability of each member of the unitary group must be computed using the combined reporting procedures described in this publication. A separate computation of tax liability for each member of the group should be included with the group return. Each member incorporated, qualified to do business, or doing business in this state must pay at least the minimum franchise tax set forth in R&TC Sections 23153 and 23181. The tax liabilities of the electing group members are then aggregated and reported on the group return. Filing a group return does not change the tax liabilities of the taxpayer members.

The designated "key corporation" makes the election on behalf of itself and the electing members by completing Schedule R-7, Election to File a Unitary Taxpayers' Group Return, and attaching the schedule to the return. By filing a group return and the completed Schedule R-7, each electing member indicates acceptance of all terms and conditions set forth in the Schedule R-7 and instructions. The election is binding for the taxable year of the election and for all matters pertaining to the taxable year of the election.

To be eligible to make the election to file a group return, each corporation must meet all of the following:

- 1) Be a taxpayer required to file a return in California.
- 2) Be a member of a combined report for its entire taxable year.
- 3) Have the same taxable year as the key corporation or have a taxable year that is wholly included within the taxable year of the key corporation.
- 4) Have the same statutory filing date as the key corporation for the taxable year.

If a corporation is not a member for the entire taxable year, they are not allowed to file a group return with the other members. Instead, the corporation files a separate return and attaches a copy of the combined report relating to all of the unitary members.

For each corporation in the group return provide the complete legal name as registered with the California SOS for each corporation qualified to do business or incorporated in California, the California corporation number, and FEIN. **Do not** use abbreviations unless the abbreviation is part of the corporation's legal name. This information should be provided on the Schedule R-7. For more information, get Schedule R and go to Side 6, Schedule R-7.

Exceptions — When a Group Return Is Not Allowed

Due to statutory filing requirements, California corporations that have different accounting periods may not be included in a group return except as provided above. The business income of such corporations must be apportioned in accordance with the instructions for corporations that have different accounting periods (see page 6) and reported on a separate return.

Corporations may not file a group return if more than one unitary business is being conducted by any one taxpayer. For more information, get Schedule R for Schedule R-7 instructions.

Example of Combined Report Computations and Schedules

For taxable years beginning on or after January 1, 2013, R&TC Section 25128.7 provides that apportioning trades and businesses shall apportion business income using the Single-Sales Factor Formula. However, certain apportioning trades or business activities described in R&TC Section 25128(b) shall apportion business income using the Three-Factor Formula.

Schedule 5, Combined Apportionment Formula and Entity Income Assignment, includes information for both Single-Sales Factor and Three-Factor Formulas. Entities/corporations that qualify for the Three-Factor Formula should refer to Schedule 5-D, Part B.

Corporations A, B, C, D, and E are engaged in a unitary business of manufacturing and selling items of tangible personal property. All members of the unitary group compute their separate entity income on a calendar year basis, except Corporation D, which uses a September 30 fiscal year end. The income and apportionment data for each of these corporations are reflected in the schedules that follow. Those schedules are explained in detail and additional facts that are specific to each member of the group are as follows:

Corporation A. Corporation A, a California domiciliary, is the parent corporation for the unitary group, and is the principal member of the group. Thus, all members of the combined reporting group must align their income and apportionment factors to Corporation A's calendar year for apportionment purposes.

Corporation A manufactures a product, some of which it sells to Corporation E. Corporations A and E use the first-in, first-out (FIFO) method of inventory accounting. In 2013, Corporation A sold \$500,000 of product to Corporation E. The cost of goods sold for that sale was \$400,000, resulting in an intercompany profit of \$100,000. At the end of 2013, \$100,000 in inventory purchased from Corporation A remained unsold in Corporation E's hands. Corporation A's remaining deferred intercompany income from those sales was \$20,000. In 2014, Corporation E sold the remaining inventory it had purchased from Corporation A in the earlier year to an unrelated customer. In that same year, Corporation A sold additional product to Corporation E in the amount of \$600,000. The cost of goods sold for that sale was \$420,000, resulting in an intercompany profit of \$180,000. At the end of the year, \$100,000 in inventory remained unsold. Intercompany transactions are determined in accordance with Cal. Code Regs., tit. 18 section 25106.5-1 and are taken into account under the matching rule when there is a difference between the buyer's corresponding item and the recomputed corresponding item. For more information, see the section entitled "Adjustments for Intercompany Transactions" on page 6. Because Corporation E sold all of its inventory from year 2013 intercompany purchases from Corporation A, the amount of deferred income attributable to those sales that is required to be restored under the matching rule is \$20,000. For the year 2014, the amount of deferred income attributable to intercompany sales is \$180,000, of which \$150,000 is required to be restored under the matching rule. Corporation A's remaining deferred intercompany income from those sales was \$30,000. Thus, the net deferred income from intercompany transactions in 2013 and 2014 is \$10,000 (see Schedule 1-C).

Corporation A has \$100,000 interest income from its outstanding accounts receivable, \$60,000 of which was attributable to California receivables. Losses of \$100,000 were attributable to sales of obsolete equipment. The total gross receipts from the sales were \$170,000, \$68,000 of which were attributable to California. Corporation A received a \$200,000 dividend from its unitary subsidiary, Corporation B. Because the dividend was paid from unitary earnings and profits accrued during a period in which Corporations A and B were in the same combined reporting group, the dividends are eliminated from income under R&TC Section 25106. In addition to income from its unitary business activity, Corporation A had dividend income of \$150,000 from nonbusiness investments and a \$30,000 partnership loss from a nonunitary oil and gas limited partnership operating entirely within California. The partnership had tax preference items for depletion and intangible drilling costs, of which Corporation A's distributive share was \$40,000 and \$10,000, respectively. After the tax preference items were applied, Corporation A's net AMTI attributable to the partnership was a positive \$20,000 (see Schedule 6-A).

Corporation B. Corporation B operates entirely outside of California but has some mail order sales to California customers. This example assumes that Corporation B is not taxable in California. (For further discussion of taxability within the state, refer to FTB Pub. 1050, Application and Interpretation of Public Law 86-272). Because Corporation B is not a California taxpayer, its sales to California are not assigned to this state. Corporation B also derives interest income from its outstanding accounts receivable. During the year, Corporation B sold a fixed asset to Corporation D for a sales price of \$210,000 and a gain of \$140,000. As explained in the section entitled "Adjustments for Intercompany Transactions" on page 6, the gain was deferred. Corporation B paid \$10,000 of intercompany interest to Corporation C. The interest income is considered a current expense item to Corporation B and a current income item to Corporation C.

Corporation C. Sixty percent of the stock of Corporation C, was acquired by Corporation A on July 1 from an unrelated individual. Because of the economic relationship that existed prior to the acquisition, Corporation C became a member of the unitary group immediately upon acquisition. Because a short-period federal return was not required, Corporation C was not required to file a short-period return for California as a result of the acquisition but did an interim closing of its books on July 1. Corporation C has income from a California source based on the aggregate of its own income prior to acquisition, plus its apportioned share of the business income of the combined reporting group after the acquisition. Corporation C also has business rental income from leasing a portion of the ground floor of its headquarters to unrelated third parties. Corporation C was a limited partner in a nonunitary oil and gas partnership operated entirely within California and incurred a \$150,000 partnership loss. The partnership had a December 31 year-end. The partnership had tax preference items for depletion and intangible drilling costs, of which Corporation C's distributive share was \$200,000 and \$15,000, respectively. After the tax preference items were applied, Corporation C's net AMTI attributable to the partnership was a positive \$65,000 (see Schedule 6-A).

Corporation D. Corporation D computes its income on a September 30 fiscal year end. Because it is on a different accounting period than the principal member, Corporation A, it must fiscalize its income to the accounting period of Corporation A for purposes of the apportionment of income. Thus, a portion of its income from two separate accounting periods will be reflected in the combined report. Because Corporation D's income and apportionment factors remained stable throughout both periods, it is permitted to use the pro-rata method of fiscalization. After its income is apportioned to California, Corporation D must then prorate its apportioned share of the business income of the group back to its own respective accounting periods (see Schedule 3). Because Corporation D's return is due on December 15, it cannot include its tax liability in a group return filed by its parent, Corporation A, and must file its own return.

Corporation D purchased asset from Corporation B for \$210,000 with an original cost basis of \$70,000. Corporation D also had a \$500 tax credit carryover and a new tax credit of \$125 for disabled access.

Corporation E. Corporation E was a member of the unitary group for the entire accounting period of Corporation A, the principal member. Corporation E purchased some of its inventory from Corporation A, a portion of which remained unsold at the end of the year. Corporation E also had a research and development tax credit in the amount of \$2,000.

Corporation E sold business capital stock for \$400,000 resulting in a gain of \$100,000. Corporation E also had a California nonbusiness capital stock loss of \$20,000.

The following schedules show the income computations for Corporations A, B, C, D, and E under the California combined reporting method:

Schedule 1: Combined income subject to apportionment

For Corporations A, B, and E, this schedule reflects items of income and deduction for the calendar year ending 12/31/14. For Corporation C, only income and deductions incurred during the post-acquisition period of 7/1/14 through 12/31/14 are included in the combined report. Schedule 1-C shows the restoration and deferral of income from intercompany transactions.

Schedule 2: Corporation C's entire income for 2014

Corporation C's income for its pre- and post-acquisition period are shown in Schedule 2. Only the post-acquisition income is included in the combined report.

Schedule 3: Computations to place Corporation D's income and apportionment factors on a calendar year basis

If the interim closing-of-the-books method had been used to determine Corporation D's income for the 12/31/14 taxable year, then Corporation D's actual income for the calendar year would have been included in Schedule 1. In this example, however, Corporation D uses the pro-rata method of combining corporations with different accounting periods. Adjustments to convert Corporation D's income to the common year-end are shown on Schedule 3. The schedule calculates 9/12 of the income and deductions from the period ending 9/30/14, and 3/12 of the income and deductions from the period ending 9/30/15 to derive the income and deductions assigned to the 12/31/14 calendar year. The property, payroll, and sales are calculated and included in the same manner. Proration of Corporation D's share of the combined report business income back to Corporation D's accounting period is shown in Schedule 5-F.

Schedule 4: Calculation of combined interest offset

The United States Supreme Court held California's interest offset provision, R&TC Section 24344(b), to be unconstitutional in circumstances in which non-business dividends or interest which are allocated outside of California exists within a unitary group (*Hunt-Wesson v. Franchise Tax Board* (2000) 120 S.Ct. 1022). As provided in FTB Notice 2000-9, the statute continues to apply for all corporations, to interest expense assigned to business interest income. For taxable years beginning on or after February 22, 2000, that portion of the interest offset that assigns interest expense to nonbusiness interest and dividend income shall apply only to interest expense assignable to nonbusiness interest and dividend income allocated to California.

Schedule 5: Combined apportionment formula and entity income assignment

Note: Schedule 5-A through 5-D illustrate how both the the Single-Sales Factor Formula and the Three-Factor Formula are calculated.

Schedules 5-A through 5-C first compute the combined property, payroll and sales within and outside California. For Corporation D, the property, payroll, and sales figures are from Schedule 3.

On Schedule 5-D, the combined California apportionment percent is computed for each member, then multiplied by the combined unitary business income (from Schedule 1-B), to arrive at the member's combined business income apportioned to California. Schedule 5-D, Part A calculates the apportionment percent using the Single-Sales Factor Formula. In Part B, the Three-Factor Formula, each taxpayer member divides its own California property, payroll, and sales by the total property, payroll, and sales of the combined reporting group to compute its own California apportionment percentage. Corporation B is not a taxpayer and its sales are not reflected in the California numerator.

Schedule 5-E calculates capital gains and losses using the Three-Factor Formula apportionment percentage. If using the Single-Sales Factor Formula, the combined apportionment percentage would be 33.6448% (from Schedule 5-D, Part A, line 4).

Schedule 5-F uses the business income amounts as calculated with the Three-Factor Formula. Corporation A's share of California business income is adjusted by nonbusiness income attributable to California, and the interest offset is applied. The California business income of Corporation C is adjusted by its nonbusiness loss to derive its net income for state purposes for the period 7/1/14 through 12/31/14. This figure is combined with Corporation C's separate income for the period 1/1/14 through 6/30/14 (from Schedule 2) to arrive at Corporation C's net income for the entire calendar year. In this example, Corporation C has a net loss in which Corporation C elects to waive the NOL carryback, so 100% of the net loss will be available to be carried forward and applied against Corporation C's California net income in subsequent years. The California business income assigned to Corporation D for the 2014 calendar year period is adjusted by 9/12 and is combined with 3/12 of the 2013 calendar year income (from the prior year combined reporting calculation) to arrive at Corporation D's net income for its 9/30/14 fiscal end period. California income subject to tax and the tax of each taxpayer member is shown on Schedule 5-F. The aggregate tax amount that would be reported on the group return would be \$31,799 (\$22,566 for Corporation A, and \$9,233 for Corporation E). Only Corporation A and Corporation E may elect to file a group return. Neither Corporation C nor Corporation D is eligible to be included in a group return. Corporation C is a part-year member with net income including separate income from the pre-acquisition period, and Corporation D files its returns on a different year end from the remainder of the group. Corporation C and Corporation D must therefore file their own returns and include a copy of the combined report computations.

Schedule 6: Combined alternative minimum tax

The alternative minimum tax is computed using the combined reporting method. Schedule 6 shows the adjustments to combined reporting income to reflect the application of the alternative minimum tax, including adjustments attributable to adjusted current earnings (ACE). The alternative minimum tax amount is then carried into Schedule 5-F in the determination of each taxpayer member's respective tax liability.

Taxes	\$28,000	\$21,000	\$20,000	\$5,000	\$26,000
Depreciation	\$60,000	\$45,000	\$72,000	\$18,000	\$63,000
California corporation tax	\$24,000	\$18,000	\$20,000	\$5,000	\$23,000
Excess depreciation	\$4,000	\$3,000	\$8,000	\$2,000	\$5,000
Nonbusiness income items	0	0	0	0	0
Property everywhere (year end)*					
Inventory	\$128,000	\$96,000	\$176,000	\$44,000	\$140,000
Fixed depreciable assets	\$420,000	\$315,000	\$460,000	\$115,000	\$430,000
Land	\$10,000	\$7,500	\$10,000	\$2,500	\$10,000
California property (year end)*					
Inventory	\$12,000	\$9,000	\$20,000	\$5,000	\$14,000
Fixed depreciable assets	\$24,000	\$18,000	\$28,000	\$7,000	\$25,000
Rent expense	\$1,800	\$1,350	\$1,800	\$450	\$1,800
Payroll everywhere*	\$696,000	\$522,000	\$540,000	\$135,000	\$657,000
California payroll*	\$16,000	\$12,000	\$100,000	\$25,000	\$37,000
Sales everywhere	\$2,800,000	\$2,100,000	\$2,000,000	\$500,000	\$2,600,000
California sales	\$716,000	\$537,000	\$1,000,000	\$250,000	\$787,000

Note: The Total column is the sum of the 9/12 column and the 3/12 column.

*Only entities/corporations that are required to use the Three-Factor Formula calculate property and payroll factors.

SCHEDULE 4 – CALCULATION OF COMBINED INTEREST OFFSET

		COMBINED TOTALS	
1	Total interest expense deducted	\$260,000	
2	Water's-edge offset (from form FTB 2424)	0	
3	Net interest expense (amount on line 1 less amount on line 2)		\$260,000
4	Total interest income	\$180,000	
5	Less nonbusiness interest income	0	
6	Business interest income		\$180,000
7	Balance: line 3 minus line 6, but not less than zero		\$80,000
8	Total dividend income	\$350,000	
9a	Less water's-edge dividends deducted	0	
b	Less intercompany dividends deducted	(\$200,000)	
10	Balance	\$150,000	
11	Business dividend income	0	
12	Net nonbusiness dividend income (line 10 minus line 11)		\$150,000
13	Total nonbusiness interest and dividends (line 5 plus line 12)		\$150,000
14	Interest offset (assignable 100% to Corp A) (enter lesser of line 7 or line 13)		\$80,000

In the example, only one entity has California nonbusiness dividend income. If more than one entity had California nonbusiness interest and/or nonbusiness dividend income, the interest offset would be prorated between entities by the ratio of each entity's California nonbusiness interest and/or nonbusiness dividends to the total California nonbusiness interest and nonbusiness dividends. For more information, see FTB Notice 2000-9 regarding the policy for the application of R&TC Section 24344(b).

Note: A contributions adjustment applicable to nonbusiness income of multiple entities may also require such computations.

SCHEDULE 5 – COMBINED APPORTIONMENT FORMULA AND ENTITY INCOME ASSIGNMENT

5-A: COMBINED APPORTIONMENT DATA (PROPERTY FACTOR)*

PROPERTY FACTOR	CORP A	CORP B	CORP C	CORP D <small>(pro-rated from Sch. 3)</small>	CORP E	COMBINED
Property everywhere						
Inventory – 12/31/14	100,000	150,000		140,000	120,000	
Fixed depreciable assets – 12/31/14	1,100,000	310,000	See Monthly	430,000	430,000	
Land – 12/31/14	50,000	0	Average	10,000	100,000	
Less intercompany profit included above	0	0	Computation	(140,000) ¹	(30,000)	
Total – end of year	1,250,000	460,000	(Sch. 5-B)	440,000	620,000	
Total – beginning of year (from 2013 report)	1,370,000	575,000		755,000	580,000	
Total beginning and ending	2,620,000	1,035,000		1,195,000	1,200,000	
Average owned property (divide by 2)	1,310,000	517,500	175,000	597,500	600,000	3,200,000
Rent expense (excluding intercompany and nonbusiness)	4,800	30,000	8,000	7,200	0	50,000
Capitalize (multiply by 8)	38,400	240,000	64,000	57,600	0	400,000
Combined property everywhere	1,348,400	757,500	239,000	655,100	600,000	3,600,000
California property						
Inventory – 12/31/14	41,000	0		14,000	95,000	
Fixed depreciable assets – 12/31/14	400,000	0	See Monthly	25,000	330,000	
Land – 12/31/14	20,000	0	Average	0	70,000	
Less intercompany profit included above	0	0	Computation	0	0	
Total – end of year	461,000	0	(Sch. 5-B)	39,000	495,000	
Total – beginning of year (from 2013 report)	427,000	0		47,000	453,000	
Total beginning and ending	888,000	0		86,000	948,000	
Average owned property (divide by 2)	444,000	0	175,000	43,000	474,000	1,136,000
Rent expense (excluding intercompany and nonbusiness)	1,200	0	8,000	1,800	0	11,000
Capitalize (multiply by 8)	9,600	0	64,000	14,400	0	88,000
Combined California property	453,600	0	239,000	57,400	474,000	1,224,000

1 – The \$140,000 is removed to return the fixed asset purchased from Corporation B to its original cost basis of \$70,000.

*Only entities/corporations that are required to use the Three-Factor Formula calculate property and payroll factors.

SCHEDULE 5 – COMBINED APPORTIONMENT FORMULA AND ENTITY INCOME ASSIGNMENT

**5-B: COMPUTATION OF AVERAGE PROPERTY VALUES FOR CORP C
(PARTIAL YEAR COMBINATION)**

MONTHLY AMOUNTS TO BE INCLUDED IN THE COMBINED PROPERTY FACTOR	MONTHLY AMOUNTS TO BE INCLUDED IN THE COMBINED PROPERTY FACTOR			TOTAL
	INVENTORY	FIXED DEPRECIABLE	LAND	
January	0	0	0	0
February	0	0	0	0
March	0	0	0	0
April	0	0	0	0
May	0	0	0	0
June	0	0	0	0
July	\$10,000	\$260,000	\$30,000	\$300,000
August	50,000	260,000	30,000	340,000
September	60,000	260,000	30,000	350,000
October	70,000	260,000	30,000	360,000
November	80,000	260,000	30,000	370,000
December	90,000	260,000	30,000	380,000
TOTAL	\$360,000	\$1,560,000	\$180,000	\$2,100,000
AVERAGE	\$30,000	\$130,000	\$15,000	\$175,000

Note: All of Corporation C's owned tangible property is located in California, so the same amounts will be included in both the numerator and denominator of the property factor (see Schedule 5-A).

SCHEDULE 5 – COMBINED APPORTIONMENT FORMULA AND ENTITY INCOME ASSIGNMENT

5-C: COMBINED APPORTIONMENT DATA (PAYROLL/SALES FACTOR)*

PAYROLL FACTOR*	CORP A	CORP B	CORP C	CORP D	CORP E	COMBINED
Payroll everywhere	1,630,000	1,293,000	420,000	657,000	750,000	4,750,000
California payroll	553,000	0	210,000	37,000	530,000	1,330,000

SALES FACTOR	CORP A	CORP B	CORP C	CORP D	CORP E	COMBINED
Sales everywhere	7,000,000	4,000,000	1,900,000	2,600,000	2,600,000	18,100,000
Gross receipts, less returns and allowances	270,000 ⁽¹⁾	280,000 ⁽²⁾	70,000 ⁽³⁾	0	0	620,000
Other gross receipts (rents, royalties, etc.)					400,000 ⁽⁶⁾	400,000
Sale of stock					0	(820,000)
Less intercompany receipts	(600,000)	(210,000)	(10,000) ⁽⁴⁾	0	0	
Total sales everywhere	6,670,000	4,070,000	1,960,000	2,600,000	3,000,000	18,300,000

California sales						
Sales delivered or shipped to California purchasers:						
i) Shipped from outside California		0 ⁽⁵⁾				0
ii) Shipped from within California	3,000,000		1,190,000	787,000	1,292,000	6,269,000
Sales shipped from California by a unitary member to:						0
i) The United States Government						
immune under Public Law 86-272	100,000		70,000 ⁽³⁾			100,000
Other gross receipts (rents, royalties, etc.)	128,000		70,000			198,000
Less intercompany receipts	(400,000)		(10,000) ⁽⁴⁾			(410,000)
Total California sales	2,828,000	0	1,250,000	787,000	1,292,000	6,157,000

*Only entities/corporations that are required to use the Three-Factor Formula calculate property and payroll factors.

- (1) Equipment sale = \$170,000
- Interest = 100,000
- (2) Equipment sale = \$210,000
- Interest = 70,000
- (3) Interest = \$10,000
- Rents = 60,000
- (4) Intercompany interest income
- (5) Sales not assigned to California because Corporation B does not have Nexus
- (6) Sale of business capital assets

SCHEDULE 5 – COMBINED APPORTIONMENT FORMULA AND ENTITY INCOME ASSIGNMENT

5-D: COMBINED APPORTIONMENT FACTORS AND ENTITY INCOME ASSIGNMENT

Part A. Standard Method – Single-Sales Factor Formula. Complete this part if the corporation uses the Single-Sales Factor Formula.

	CORP A	CORP B	CORP C	CORP D	CORP E	COMBINED
1 EVERYWHERE: Sales						18,300,000
2 CALIFORNIA: Sales	2,828,000	0	1,250,000	787,000	1,292,000	6,157,000
3 UNITARY BUSINESS INCOME TO BE APPORTIONED (from Schedule 1-B)						1,850,000
4 CALIFORNIA APPORTIONMENT PERCENT						
(California sales divided by everywhere sales) (line 2 ÷ line 1)	15.45355%	0.00000%	6.8306%	4.30054%	7.0601%	33.6448%
5 BUSINESS INCOME APPORTIONED TO CALIFORNIA (line 3 x line 4)	\$285,891	0	\$126,366	\$79,560	\$130,612	\$622,429

Part B. Three-Factor Formula. Complete this part **only** if the corporation uses the Three-Factor Formula. (The Three-Factor Formula includes the single-weighted sales factor.)

	CORP A	CORP B	CORP C	CORP D	CORP E	COMBINED
1 EVERYWHERE: Property						3,600,000
2 Payroll						4,750,000
3 Sales						18,300,000
4 CALIFORNIA: Property	453,600	0	239,000	57,400	474,000	1,224,000
5 Payroll	553,000	0	210,000	37,000	530,000	1,330,000
6 Sales	2,828,000	0	1,250,000	787,000	1,292,000	6,157,000

7 UNITARY BUSINESS INCOME TO BE APPORTIONED (from Schedule 1-B) 1,850,000

CALIFORNIA APPORTIONMENT PERCENT (California property, payroll, sales divided by combined property, payroll, sales)

8 Property factor (line 4 ÷ line 1)	12.6000%		6.6389%	1.5944%	13.1667%	34.0000%
9 Payroll factor (line 5 ÷ line 2)	11.6421%		4.4211%	0.7789%	11.1579%	28.0000%
10 Sales factor (line 6 ÷ line 3)	15.4536%		6.8306%	4.3005%	7.0601%	33.6448%
11 Total	39.6957%		17.8906%	6.6738%	31.3847%	95.6448%
12 Apportionment percentage (divide by 3)	13.2319%	0.0000%	5.9635%	2.2246%	10.4616%	31.8816%
13 BUSINESS INCOME APPORTIONED TO CALIFORNIA (Line 7 x line 12)	\$244,790	0	\$110,325	\$41,155	\$193,540	\$589,810

SCHEDULE 5 - COMBINED APPORTIONMENT FORMULA AND ENTITY INCOME ASSIGNMENT
5-E: CAPITAL GAIN (LOSS)

Period for which California return is to be filed	CORP A	CORP B	CORP C	CORP D	CORP E	COMBINED
Apportionment percentage (from Sch. 5-D)***	13.2319%	0.0000%	5.9635%	2.2246%	10.4616%	31.8816%
Section 1231: \$100,000 loss from Corporation A (sale of obsolete equipment)	(13,232)		(5,964)	** (1,668)	(10,462)	(31,326)
Business capital stock gain apportioned to California (\$100,000 from Corporation E)	13,232	0	5,964	* 1,668	10,462	31,326
Nonbusiness capital stock loss (from Corporation E)					(20,000)	
Post-apportioned capital gains (losses) netting	0	0	0	0	*** (20,000)	0

* Corporation D's apportionment shares of the business capital gain is adjusted to reflect the defiscalization. $(\$100,000 \times 2.2246\% = \$2,224.60 \times 9/12's = \$1,668)$
 ** Corporation D's apportionment share of Section 1231 loss is adjusted to reflect the defiscalization $(\$100,000 \times 2.2246\% = \$2,224.60 \times 9/12's = \$1,668)$.
 *** Corporation E has a California sourced carryover loss of \$10,462.
 **** For the purpose of this example, the entity/corporations are using the Three-Factor Formula apportionment percentages from Schedule 5-D, Part B, line 12.

SCHEDULE 5 – COMBINED APPORTIONMENT FORMULA AND ENTITY INCOME ASSIGNMENT

5-F: CALIFORNIA NET INCOME AND TAX

	CORP A	CORP B	CORP C	CORP D	CORP E
Period for which California return is to be filed	1/1/14-12/31/14	None	7/1/14-12/31/14	10/1/13-9/30/14	1/1/14-12/31/14
BUSINESS INCOME APPORTIONED TO CALIFORNIA					
CORP A (from Schedule 5-D)	\$244,790				
CORP C (from Schedule 5-D)			\$110,325		
CORP D:					
For 12 months ended 12/14 (from Schedule 5-D)				\$41,155	
Portion reportable in current year (9/12)				\$30,866	
For 12 months ended 12/13 prior year calculation				\$41,155	
Portion reportable in current year (3/12)				\$10,289	
CORP D total for year ended 9/30/14				\$41,155

Less: Interest offset								
10 ADJUSTED CURRENT EARNINGS	(80,000)							
11 Pre-adjustment AMTI (Schedule 6-A, line 10)	339,355	0	177,382	41,923	197,149			
12 Difference	339,289	0	177,352	41,911	197,097			
13 75% of Difference	66	0	30	12	52			
14 Negative ACE limitation: for each taxpayer excess of aggregate prior year positive line 13 ACE adjustments over aggregate prior year negative line 13 ACE adjustments:	50	0	23	9	39			
15 ACE ADJUSTMENT*	\$0	0	0	0	0	\$23	\$9	\$39

* If line 13 is negative, it is allowed as a negative ACE adjustment only to the extent of that taxpayer's total increases in AMTI from prior year California ACE adjustments exceed its total reduction in AMTI from prior year California ACE adjustments.

** For the purpose of this example the entity/corporations are using the Three Factor-Formula apportionment percentages from Schedule 5-D, Part B, line 12.
